

Heavy Industry and Agriculture Sealing Solutions

for performance, resilience, and longevity in harsh, demanding environments

O-Rings

Back-up Rings

X-Rings / Quad Rings

Rotary / Lip Seals

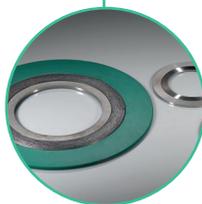

Hydraulic Seals

Wiper Seals

Piston Seals

Gaskets

Rod Seals

V-Rings

Reliable sealing products for exceptional durability and efficiency, to ensure machinery and equipment operates smoothly in the demanding needs of heavy industry and agriculture. With years of expertise, we understand that performance, resilience, and longevity are paramount.

Reduce Maintenance Costs and Downtime

In sectors like agriculture and heavy industry, where machinery operates in harsh, high-demand environments, the risk of failure due to poor sealing can lead to costly repairs and production delays. Our seals and gaskets are engineered to prevent contaminants, leaks, and wear, which helps reduce maintenance costs and downtime - ultimately improving the efficiency and profitability of your operation.

QUALITY YOU CAN TRUST

Our quality department, which includes our test laboratory, is responsible for maintaining high standards of product quality and compliance, and validating our products to meet industry standards.

We are proud to be certified in several areas for quality, health and safety and environmental management.

- ISO 9001:2015 — ISO 45001:2018
- ISO 14001:2015 — EN 9120:2018

HEAVY EQUIPMENT

- Construction machinery, cranes, excavators, bulldozers etc
- Boilers, turbines, compressors and pumps, industrial gearboxes, chemical reactors
- Underground drilling rigs, rock crushers, slurry pumps, conveyor systems

AGRICULTURAL EQUIPMENT

- Tractors and harvesters
- Irrigation pumps and pipelines
- Chemical sprayers and tanks
- Dairy and food processing machinery
- Grain storage systems

MATERIAL	PROPERTIES	TYPICAL APPLICATIONS
Rubber (Nitrile, EPDM)	Flexible, resistant to oils, weather, and chemicals (varies by type)	Tractor engines, irrigation pumps, fertilizer spreaders. Hydraulic seals, fuel systems, heavy machinery
Fluoroelastomer (Viton™/FKM)	High chemical & heat resistance	Seals in fuel systems, chemical transport, exhaust systems
Silicone	High temperature resistance, flexible, UV stable	Greenhouses, milking systems, food processing equipment
PTFE (Teflon™)	Chemically inert, non-stick, high-temp resistant	Chemical tanks, pesticide sprayers, pipe flanges. Valve seats, flange gaskets, aggressive fluid sealing.
Polyurethane (PU)	Abrasion-resistant, strong yet flexible	Hydraulic systems, slurry equipment, irrigation systems, wipers, scrapers, mining tools
